

MINTAE KIM

Irvine, CA • mintae3827@gmail.com • 949-735-4720 • [LinkedIn](#) • [GitHub](#) • [Website](#)

Software engineer with 5+ years coding, building LLM-powered agent systems and high-concurrency production servers.

PROFESSIONAL EXPERIENCE

Funigloo — Game Server Developer [\[Notion\]](#)

Jan 2024 – Feb 2026

- Redesigned the broadcast cache architecture, raising single-map capacity from **250 to 600 players** and load-testing **50,000 concurrent connections** via parallel bot clients.
- Built a **zone-partitioned threading model** across **10 worker threads** to remove resource contention, with cross-server sync via master-server routing and P2P UDP hole punching.
- Split the monolithic server into **6 microservices** (Auth, Game, Guild, Log, Control, GM) for fault isolation and independent scaling.

Freelance — Automation Software Engineer [\[GitHub1\]](#) [\[GitHub2\]](#)

Jan 2022 – Dec 2023

- Delivered Python/Selenium automation tools and PyQt desktop apps to **20+ paying clients**, covering data collection, web scraping, and transaction workflows.

PROJECTS

Fastlane — AI Evaluation Platform [\[Website\]](#)

Jan 2026 – June 2026

- Built and shipped an **end-to-end AI proposal review platform** (Next.js, Supabase, OpenAI), covering architecture, schema, and LLM orchestration.
- Designed a **3-pass LLM scoring pipeline** (Draft → Skeptic → Judge) with **σ -based dispute routing** that **auto-clears ~70% of proposals at the first pass**, escalating only disagreed items to human review.
- Added a **rule-based quality gate** (zero LLM cost) before scoring to filter low-quality submissions and cut unnecessary OpenAI calls.

Last Ember — Unity Card Game [\[Steam\]](#)

Apr 2026 – June 2026

- Shipped a **roguelike card game in Unity** to Steam with **AI-assisted development (Claude Code)**, building the card system, turn-based combat, deck-building, and reward loops.
- Built an **AI Agent asset pipeline** orchestrating **GPT Image 2** and **Nano Banana** across agents for prompt authoring, generation, QA, and post-processing to produce **2,000+ game assets**.
- Automated cinematic trailer generation via a **Higgsfield + Claude MCP integration**.

Ruming — On-Device Persona LLM [\[GitHub\]](#) [\[HF\]](#)

May 2026

- Fine-tuned **Qwen2.5-3B with QLoRA (Unsloth)** on **1,000 hand-curated dialogue pairs** for a 15-year-friend persona.
- Diagnosed **distribution collapse** on raw chat data, switched to synthetic data, and shipped as **GGUF Q4_K_M (~2 GB)** for offline Android.

EDUCATION

Kookmin University — B.S. in Software Engineering • GPA: 4.04 / 4.5

Expected Feb 2028

SKILLS

Backend & Servers C#, C++, Python, Java • ProudNet, FastAPI, Flask • MySQL, PostgreSQL, Redis, MongoDB

Frontend React, Next.js, TypeScript, HTML/CSS, Tailwind CSS

AI & LLM Claude Code, MCP, OpenAI API, PyTorch, Hugging Face Transformers, Unsloth, QLoRA/LoRA

Infra & DevOps Docker, k3s/Kubernetes, Hetzner Cloud, AWS (EC2, Lambda), GitHub Actions, Linux

Additional Unity (C#), PyQt, Selenium
